

EXPORT CONTROL POLICY

We have developed a comprehensive set of guidelines and procedures to ensure that In Coatings successfully complies with export control laws and regulations.

PURPOSE

The goal of this policy is to foster compliance with regulations established by government and international organizations by enhancing our understanding of the law.

1. Designated Officer: We will appoint a dedicated export control officer to lead our compliance initiatives and promote a culture of adherence within the organization.
2. Procedures Development: Our team will establish clear procedures for export control compliance while actively monitoring customers and partners against denied party lists to mitigate risks.
3. License Management: We will assess the necessity of export licenses by applying for the appropriate permits and ensuring that we maintain accurate records of all licenses issued.
4. Regular Audits: We will implement regular audits to identify and address any compliance issues proactively, fostering continuous improvement in our processes.
5. Regulatory Awareness: Our organization will stay informed about regulatory updates to adapt swiftly and ensure ongoing compliance.

By committing to these actions, we aim to strengthen our compliance framework and contribute positively to the international trade environment.
